Thin-Wall Stainless Steel Unthreaded Pipe

- Use with air, natural gas, oil, water
- Fittings: Use butt-weld Schedule 10 thin-wall stainless steel (see page 34 and above)

Also known as Schedule 10, this pipe is thin and lightweight. Weld it to fittings and additional lengths of pipe. Welded connections are stronger than threaded connections and less likely to leak. Pipe has a welded construction, so there is a weld bead on the inside. Meets ANSI/ASME B36.19 and ASTM A312.

304 stainless steel pipe has very good corrosion resistance. **316 stainless steel** pipe has excellent corrosion resistance.

Pipe Size	1-ft. Lengths	3-ft. Lengths	6-ft. Lengths
